

React JS

**Getting
Started**

I'm Nick...

Callaghan

I work as a product owner during day

I taught myself to code (sort of)

Only switched to a career in IT 2 years ago

I like modern **Javascript**

YOU CAN ADD ME ON

linkedin.com/in/ncallaghan/

What is React?

**JavaScript Library for
building user interfaces**

Is it a framework?

It's a library. React doesn't include some of the things you might expect in a framework but it plays nicely with other tools.

Why use it

Component Based - We Build Reusable Components

It's fast!

It makes updating the DOM easy based on the application "State"

Great echo-system of other tools

Who uses React?

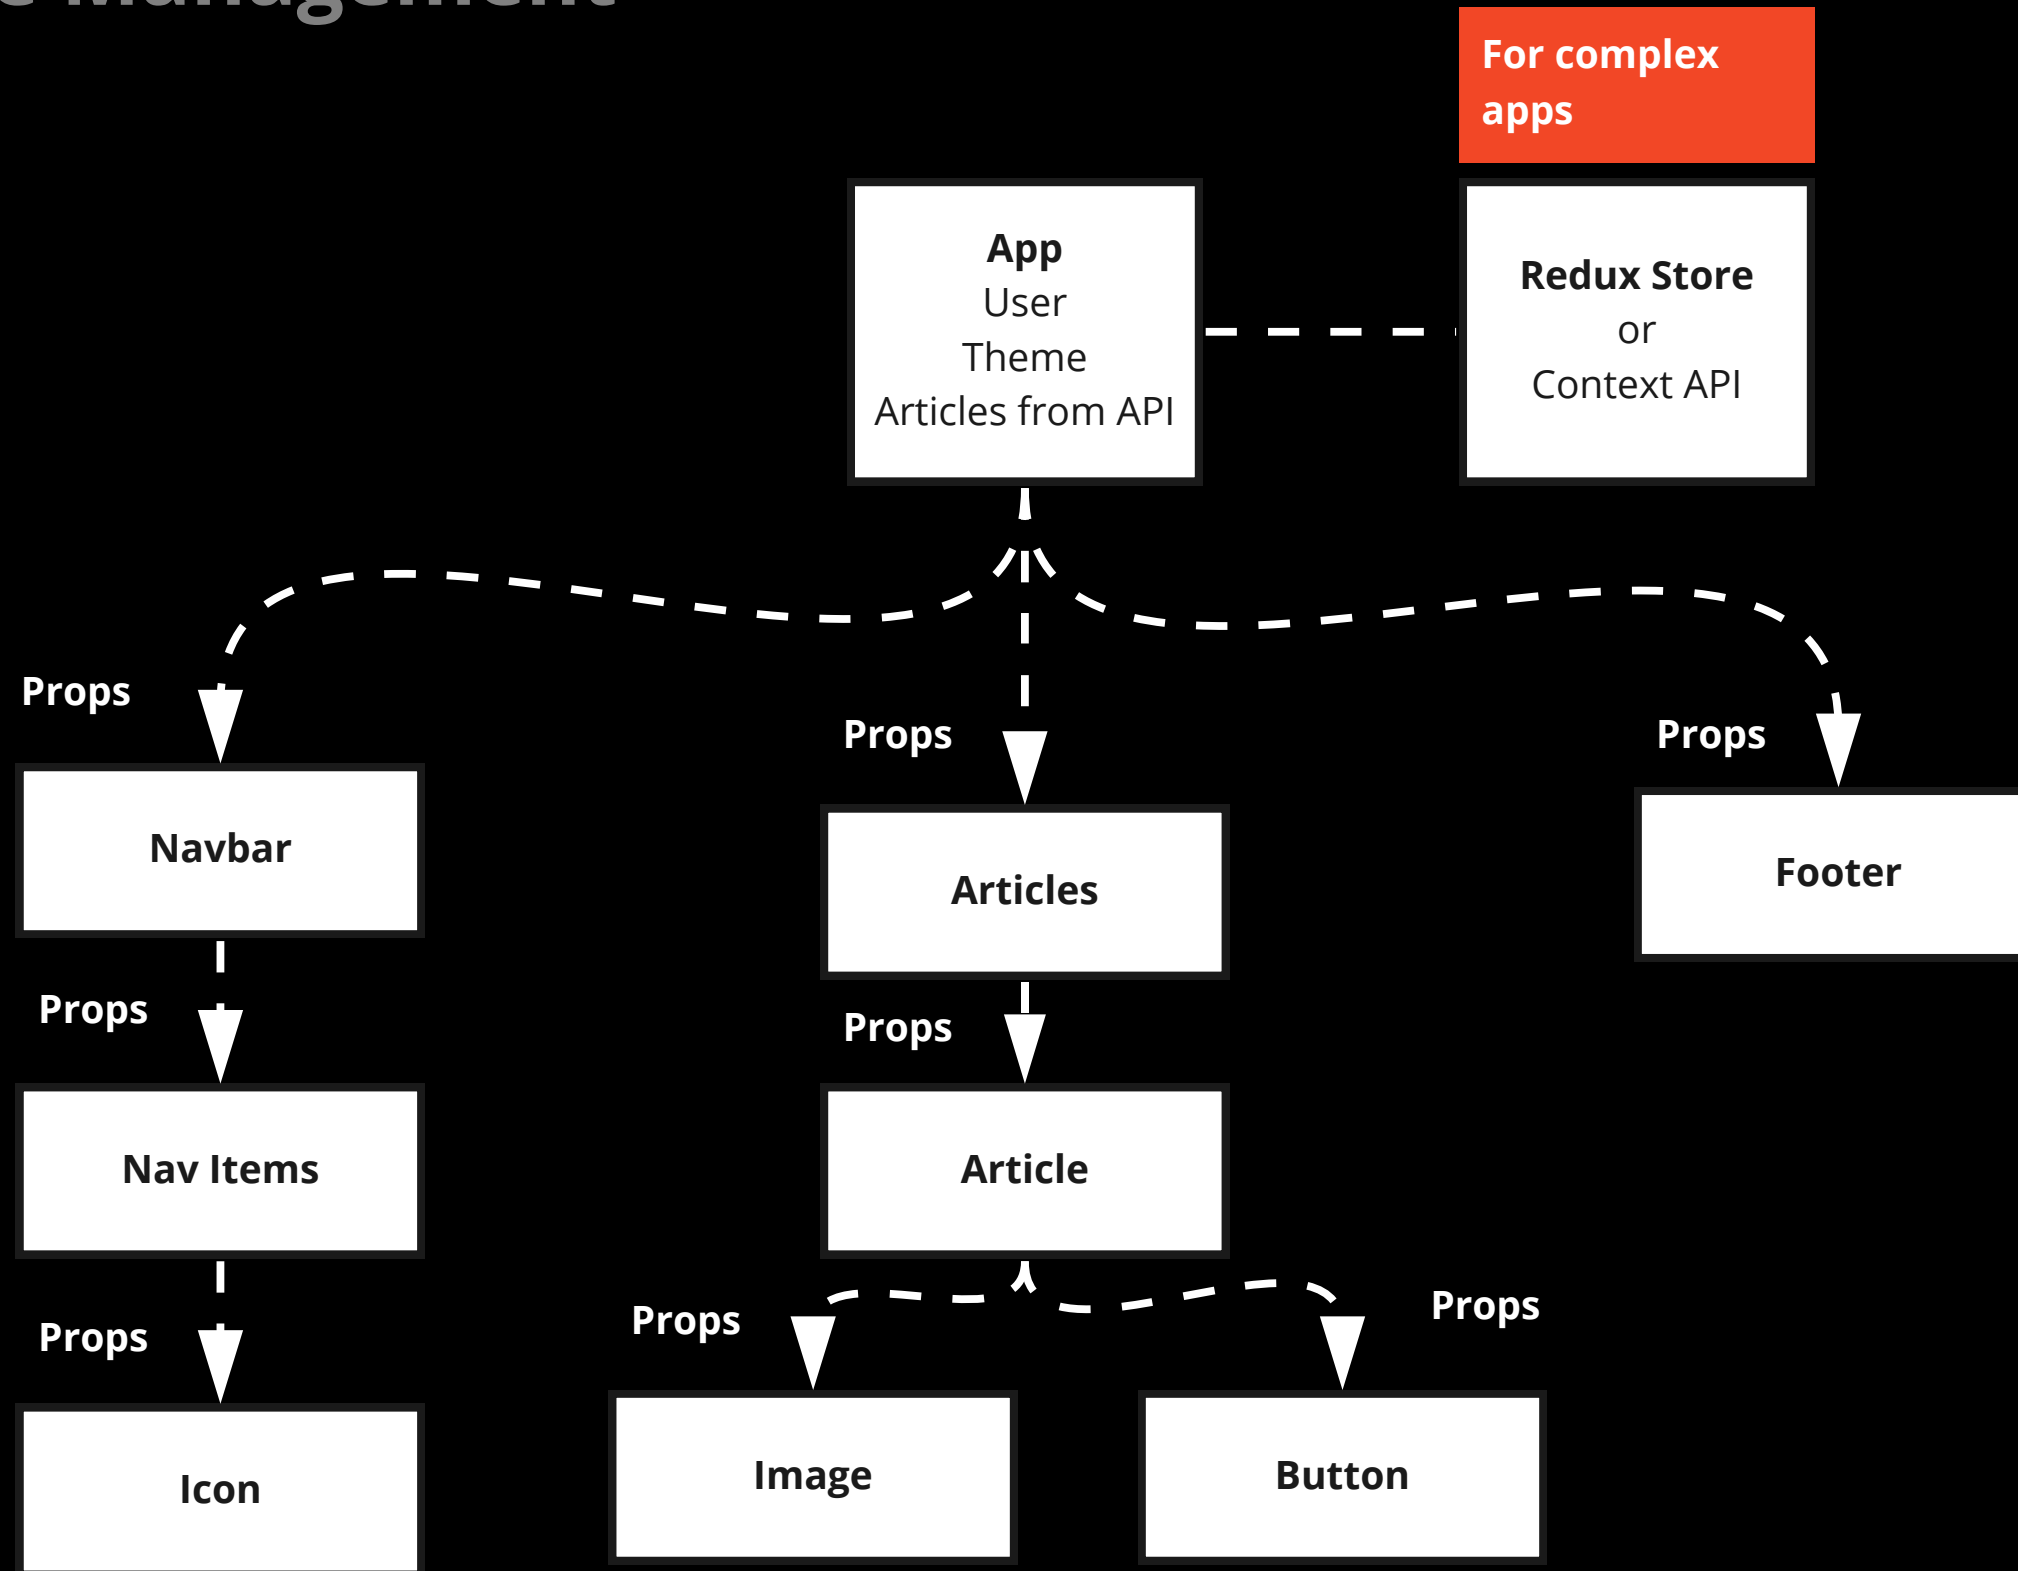

The New York Times

NETFLIX

Simple State Management

Enough Talk... Let's code
